Executive Summary

1999-00 – 2006-07 NCAA Student-Athlete Race and Ethnicity Report

For the eighth consecutive year, the NCAA compiled the following statistical information regarding student-athlete race, ethnicity and resident alien status in intercollegiate athletics at its member institutions. This information provides a general view of recent historical student-athlete race and ethnicity trends by gender, sport and division.

The first section of this report describes factors that affect the data, offers suggestions for the reader, defines the race and ethnicity categories and provides findings by division. The second section provides student-athlete race and ethnicity percentages for each sport in separate tables by year, division and for the NCAA overall. Next, the percentages in those tables are illustrated via graphs overall and by division. Separate graphs for the minority categories only are also in this section. Following the graphs section, estimated frequency tables are presented in the same format as the percentages tables. The last two sections restate the eight year's worth of percentage and estimated frequency data in separate tables for each sport.

New tables were added detailing the resident alien status of the student athletes separately from their race/ethnicity. Previously these categories were combined, but now have been separated for greater accuracy in reporting. Therefore because of the removal of resident alien as a choice among ethnic categories, the other ethnicities will increase accordingly. Student-athletes whose ethnicities were previously identified as nonresident alien are now identified with an ethnic category and the identified separately as nonresident aliens. This is particularly relevant in certain sports such as tennis and ice hockey which each have over 10 percent of total participants identified as having nonresident alien status. So some increases in ethnic percentages can be attributed to this change in methodology.

As with any data collection effort, there were minor errors and omissions in the data collection process. Data were evaluated on a school by school basis and every effort was made to ensure that corrections were made. Therefore, because of the high response rate and the low error rate the

reported percentages and frequencies can be considered good estimations of the actual student-athlete race and ethnicity data.

Overall, the percentage of Black male student-athletes has increased from 16.3 percent in 1999-00 to 18.3 percent in 2006-07. The percentage of Black female student-athletes has also increased during the same period, from 9.4 to 11.2 percent. The percentage of male and female Nonresident Aliens (foreign student-athletes) has also increased slightly from 1999-00 to 2006-07 (from 1.8 to 4.0 percent and 1.5 to 4.5 percent of the total male and female student-athlete populations respectively). Some of this increase may be the result of the change in methodology, although the same trend was evident in past reports prior to the change in methodology.

In 2006-07, the highest percentage of male basketball student-athletes in Division I was Black (60.4 percent). For just the second year in a row, the highest percentage of female basketball student-athletes was also Black (47.4 percent). The next highest percentage of male basketball student-athletes was White (32.5 percent) and the next highest percentage of female basketball student-athletes was also White (44.4 percent). The percentage of Black male basketball student-athletes in Division I has increased from 55 in 1999-00 to 60.4 percent in 2006-07. Over the same time period the percentage of Division I Black female basketball student-athletes has increased from 35.7 to 47.4 percent. The percentage of male Division I Nonresident Alien basketball student-athletes has continued to increase going from 3.0 to 8.7 percent and the percentage of female Nonresident Alien basketball student-athletes has increased from 2.4 to 7.3 percent. A portion of this increase may be the result in the change in methodology.

In 2006-07, the highest percentage of football student-athletes in Division I-FBS was Black (46.4 percent) followed closely by White football student-athletes (46.3 percent). The percentage of Black football student-athletes in Division I-FBS has steadily increased from 40.3 percent in 1999-00 to the current level in 2006-07.

Introduction

1999-00 – 2006-07 NCAA Student-Athlete Race and Ethnicity Report

Introduction

For the eighth consecutive year, the NCAA compiled the following statistical information regarding student-athlete race and ethnicity in intercollegiate athletics at its member institutions. This information provides a general view of recent historical student-athlete race and ethnicity trends by gender, sport and division.

Organization of the report

The first section of this report describes factors that affect the data, offers suggestions for the reader, defines the race and ethnicity categories and provides findings by division. After the introduction are several sections of tables and graphs. The first of these sections provides student-athlete race and ethnicity percentages for each sport in separate tables by year, division and for the NCAA overall. Next, the percentages in those tables are illustrated via graphs overall and by division. Separate graphs for the minority categories only are also in this section. Following the graphs section, estimated frequency tables are presented in the same format as the percentages tables. The last two sections restate the eight year's worth of percentage and estimated frequency data in separate tables for each sport. New this year are tables detailing the frequencies and percentages of the nonresident alien status of the student-athletes, separate from the race and ethnicity tables.

Factors affecting the data

As with any data collection effort, there were minor errors and omissions in the data collection process. Data were evaluated on a school by school basis and every effort was made to ensure that corrections were made. Therefore, because of the high response rate and the low error rate the reported percentages and frequencies can be considered good estimations of the actual student-athlete race and ethnicity data.

Methodology

Student-athlete ethnicity data is annually submitted electronically by each institution as part of the Sport Sponsorship Demographic form. This form contains data on each sport sponsored by the institution as well as the aggregate number of participants, the gender and ethnicity of the participants and the residency status of the participants in each sport. Ethnicity and participation data was sorted by institution and by sport and evaluated by the research staff for any obvious errors or omissions. Efforts were then made to make any corrections necessary. Cleaned data was then aggregated by division and by sport. Totals in the Student-Athlete Race and Ethnicity Report were also checked against totals in the Sports Sponsorship and Participation Rates Report to ensure consistency.

Suggestions for the reader

It is important to note that the statistics provided by the NCAA in this report are derived from self-reported data supplied by member institutions. No specific checks were made to verify the information provided by the institutions. While this information provides our best estimate of recent general trends in student-athlete race and ethnicity, the data may not be absolutely precise.

For sports in which the NCAA does not offer a championship, the data are even less likely to be precise. Institutions are allowed to count a limited number of non-NCAA sports toward their membership minimums, but they might not report student-athlete race and ethnicity figures for those teams.

Beginning in 2006-07 the ethnicity categories were compiled separate from the residency status of the student-athletes. The current tables for 2006-07 no longer list "nonresident alien" as an ethnicity category. Nonresident alien status is reported in separate tables immediately following

the ethnicity tables. Therefore it may not be appropriate to compare the current years' data to previous years, especially in those sports that typically have a large percentage of foreign student-athletes. However, because a trend of increasing numbers of foreign student-athletes was evident in many subgroups before 2006-07 the continuation of such a trend is still noted in this report with the caveat that a portion of the increase may be attributed to the change in methodology. In the interest of historical continuity, the sport by sport ethnicity tables that contained resident alien status categories in the past still has columns for nonresident aliens with nonresident alien data simply listed as N/A for 2006-07.

Specific questions concerning the statistics included in this report should be directed to the NCAA research department or the public and media relations department at 317/917-6222.

Race And Ethnicity Category Definitions

In an effort to increase the accuracy of the data a major change has been made to this edition of the report. For ease of comparison, the race and ethnicity categories used in this report are the same categories historically defined by the federal government and currently used in the NCAA Graduation-Rates Reports. More specifically, there are six race and ethnicity categories (i.e., American Indian/Alaskan Native; Asian/Pacific Islander; Black, Non-Hispanic; Hispanic; Other; and White, Non-Hispanic) and one category for Nonresident Aliens (i.e., foreign student-athletes). In previous reports foreign student-athletes could fall in any of the race and ethnicity categories (e.g., Black, White, or Asian) but for the purposes of this research they were only considered Nonresident Aliens. The residency status and the ethnicity of foreign students were treated as mutually exclusive events. Now with the 2006-07 report, the residency status of student-athletes is considered separately from their ethnicity. The inclusion of nonresident alien among the ethnic categories may have been a point of confusion early in this longitudinal data collection effort for those individuals submitting the data. Therefore, fluctuations in the data for Nonresident Aliens may represent a combination of changes in the actual number of student-athletes in this category, fluctuations in the accuracy of the data the NCAA received from its member institutions, and now a change in the data collection.

For the purposes of this report the following definitions were used for the race and ethnicity and residency status categories:

- American Indian or Alaskan Native - A person having origins in any of the original peoples of North America and who maintains cultural identification through tribal affiliation or community recognition.
- Asian or Pacific Islander - A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or Pacific Islands. This includes people from China, Japan, Korea, the Philippine Islands, American Samoa, India, and Vietnam.
- Black, Non-Hispanic - A person having origins in any of the black racial groups of Africa (except those of Hispanic origin).
- Hispanic - A person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race.
- White, Non-Hispanic - A person having origins in any of the original peoples of Europe, North Africa, or the Middle East (except those of Hispanic origin).
- Nonresident Alien - A person who is not a citizen or national of the United States and who is in this country on a visa or temporary basis and does not have the right to remain indefinitely.

Findings

Overall

As with the previous seven years, in 2006-07 the highest percentage of male and female student-athletes were White (72.2 and 78.8 percent respectively) with the next highest percentage of student-athletes being Black (18.3 percent for male student-athletes and 11.2 percent for female student-athletes). The percentage of Black male student-athletes has increased from 16.3 percent in 1999-00 to 18.3 percent in 2006-07. The percentage of Black female student-athletes has also increased during the same period, from 9.4 to 11.2 percent. The percentage of male and female Nonresident Aliens (foreign student-athletes) has also increased from 1999-00 to

2006-07. Male Nonresident Alien student-athletes have increased from 1.8 to 4.0 percent and female Nonresident Alien student-athletes have increased from 1.5 to 4.5 percent of the total male and female student-athlete populations. Some of this increase may be attributed to a change in reporting methodology; however it is important to note that this trend was evident before the current data collection year.

In 2006-07, the highest percentage of male and female basketball student-athletes was White (49.3 percent for males and 62.1 percent for females) followed by Black basketball student-athletes (44.1 percent for males and 30.6 percent for females). The percentage of Black and Nonresident Alien basketball student-athletes has steadily increased from 1999-00 to 2006-07. More specifically, the percentage of Black male basketball student-athletes has increased from 37.8 to 44.1 percent and the percentage of Black female basketball student-athletes has increased from 22.4 to 30.6 percent. The percentage of male Nonresident Alien basketball student-athletes has increased from 1.8 to 4.4 percent and the percentage of female Nonresident Alien basketball student-athletes has increased from 1.2 to 3.4 percent.

In 2006-07, the highest percentage of football student-athletes were White (60.2 percent) followed by Black football student-athletes (33.5 percent). The percentage of Black football student-athletes has steadily increased from 28.1 percent in 1999-00 to the current level in 2006-07.

The sports with the highest percentage of Black male student-athletes are basketball (44.1), football (33.5), outdoor track and field (21.7) and indoor track and field (20.9). Bowling (51.9), basketball (30.6), outdoor track and field (21.1) and indoor track and field (21.1) were the women's sports with the highest percentages of Black females. All other sports for both men and women had less than ten percent Black student-athletes.

Division I

As with the previous seven years, in 2006-07 the highest percentage of male (64.2 percent) and female (72.1 percent) student-athletes in Division I was White with the next highest percentage of student-athletes being Black (24.7 percent for male student-athletes and 15.7 percent for female

student-athletes). The percentage of Black male student-athletes has increased from 22.9 percent in 1999-00 to the current level in 2006-07. The percentage of Black female student-athletes has also increased during the same period, from 13.8 to 15.7 percent. The percentage of male and female Nonresident Aliens has also increased slightly from 1999-00 to 2006-07. Male Nonresident Alien student-athletes have increased from 2.4 to 6.3 percent and female Nonresident Alien student-athletes have increased from 2.4 to 7.5 percent of the total male and female student-athlete populations.

In 2006-07, the highest percentage of male basketball student-athletes in Division I were Black (60.4 percent) while for the first year the highest percentage of female basketball student-athletes was also Black (47.4 percent). The next highest percentage of male basketball student-athletes were White (32.5 percent) and the next highest percentage of female basketball student-athletes were also White (44.4 percent). The percentage of Black and Nonresident Alien basketball student-athletes has steadily increased from 1999-00 to 2006-07. More, specifically, the percentages of Black male and female basketball student-athletes have steadily increased from 55 and 35.7 to their current levels of 60.4 and 47.4 percent respectively in 2006-07. The percentage of male Nonresident Alien basketball student-athletes has increased from 3.0 to 8.7 percent and the percentage of female Nonresident Alien basketball student-athletes has increased from 2.4 to 7.3 percent.

In 2006-07, the highest percentage of football student-athletes in Division I overall were White (47.0 percent) followed closely by Black football student-athletes (45.9 percent). The percentage of Black football student-athletes in Division I overall has steadily increased from 39.5 percent in 1999-00 to the current level in 2006-07.

In 2006-07, the highest percentage of football student-athletes in Division I Bowl Subdivision for the second year in a row, were Black (46.4 percent) followed closely by White football student-athletes (46.3 percent). The percentage of Black football student-athletes in Division I Bowl Subdivision has steadily increased from 40.3 percent in 1999-00 to the current level in 2006-07.

In 2006-07, the highest percentage of football student-athletes in Division I Championship Subdivision were White (47.7 percent) followed by Black football student-athletes (45.2 percent). The percentage of Black football student-athletes in Division I Championship Subdivision has steadily increased from 38.5 percent in 1999-00 to the current level in 2006-07.

The sports with the highest percentage of Black male student-athletes are basketball (60.4), football (45.9), indoor track and field (27.5) and outdoor track and field (27.2). Bowling (54.2), basketball (47.4), indoor track and field (29.3) and outdoor track and field (28.7) were the women's sports with the highest percentages of Black females. All other sports for both men and women had less than ten percent Black student-athletes, except for women's volleyball (12.0) and men's cross country (11.1) and women's cross country (13.2).

Division II

As with the previous five years, in 2006-07 the highest percentages of male and female student-athletes in Division II were White (66.5 and 76.7 percent respectively) with the next highest percentage of student-athletes being Black (23.7 percent for male student-athletes and 12.8 percent for female student-athletes). The percentage of Black male student-athletes has increased from 19.3 percent in 1999-00 to the current level in 2006-07. The percentage of Black female student-athletes has also increased during the same period, from 10.6 to 12.8 percent. The percentage of male and female Nonresident Aliens has also increased slightly from 1999-00 to 2006-07. Male Nonresident Alien student-athletes have increased from 2.5 to 4.6 percent and female Nonresident Alien student-athletes have increased from 1.6 to 4.5 percent of the total male and female student-athlete populations in Division II.

In 2006-07, the highest percentage of male basketball student-athletes in Division II were Black (52.8 percent) while the highest percentage of female basketball student-athletes were White (57.5 percent). The next highest percentage of male basketball student-athletes were White (40.1 percent) and the next highest percentage of female basketball student-athletes were Black (33.3 percent). The percentage of Black and Nonresident Alien basketball student-athletes has steadily increased from 1999-00 to 2006-07. More specifically, the percentages of Black male and female basketball student-athletes have steadily increased from 44.8 and 24.9 to

their current levels of 52.7 and 33.3 percent respectively in 2006-07. The percentage of male Nonresident Alien basketball student-athletes has increased from 2.4 to 4.9 percent and the percentage of female Nonresident Alien basketball student-athletes has increased from 1.2 to 3.4 percent.

In 2006-07, the highest percentage of football student-athletes in Division II were White (54.2 percent) followed by Black football student-athletes (40.7 percent). The percentage of Black football student-athletes in Division II has steadily increased from 31.9 percent in 1999-00 to the current level in 2006-07.

The sports with the highest percentage of Black male student-athletes are basketball (52.8), football (40.7), outdoor track and field (25.5) and indoor track and field (21.3). Bowling (64.6), basketball (33.3), outdoor track and field (20.5) and indoor track and field (17.1) were the women's sports with the highest percentages of Black females. All other sports for both men and women had less than ten percent Black student-athletes, except for women's volleyball (11.7) and men's cross country (14.6) and women's cross country (12.2).

Division III

As with the previous four years, in 2006-07 the highest percent of male (83.1 percent) and female (87.4 percent) student-athletes in Division III were White with the next highest percentage of student-athletes being Black (9.1 percent for male student-athletes and 5.3 percent for female student-athletes). The percentage of Black male student-athletes has increased from 7.6 percent in 1999-00 to the current level in 2006-07. The percentage of Black female student-athletes has also increased slightly during the same period, from 4.2 to 5.3 percent. The percentage of male and female Nonresident Aliens has increased slightly, though most of the change can probably be attributed to the change in methodology as it occurred primarily between 2005-06 and 2006-07.

In 2006-07, the highest percentage of male (67.7 percent) and female (78.8 percent) basketball student-athletes in Division III were White. The next highest percentage of male and female basketball student-athletes were Black (26.4 and 15.8 percent respectively). The percentage of Black basketball student-athletes has steadily increased from 1999-00 to 2006-07. More specifically, the percentage of Black male basketball student-athletes

has increased from 21.1 to 26.4 percent and the percentage of Black female basketball student-athletes has increased from 10.5 to 15.8 percent. The percentage of male and female Nonresident Alien basketball student-athletes has not seen a notable change during the same period.

In 2006-07, the highest percentage of football student-athletes in Division III were White (79.5 percent) followed by Black football student-athletes (14.4 percent). The percentage of Black football student-athletes in Division III has steadily increased from 11 percent in 1999-00 to the current level in 2006-07.

The sports with the highest percentage of Black male student-athletes are basketball (26.4), football (14.4), outdoor track and field (12.4) and indoor track and field (12.3). Basketball (15.8), rugby (12.9) were the women's sports with the highest percentages of Black females. All other sports for both men and women had less than ten percent Black student-athletes, except for men's volleyball (10.5).
